

PinPoint

core
LIGHTING

Single zoomable LED pin-spot light for event highlighting. With battery power, wireless dimming, magnetic base, adjustable head focus and IP65 rated for outdoor use.

Ideal for lighting table-centres, art pieces, enhancing artefacts, or simply providing quick and easy task lighting. Much faster setup than traditional pin-spot lighting, introducing new levels of control using wireless/mobile app.

On a single charge the unit runs around 12 hours at full power. After use can then be dropped into a charging case with other units ready for next use, or onto a single charger for an individual unit.

WIRELESS

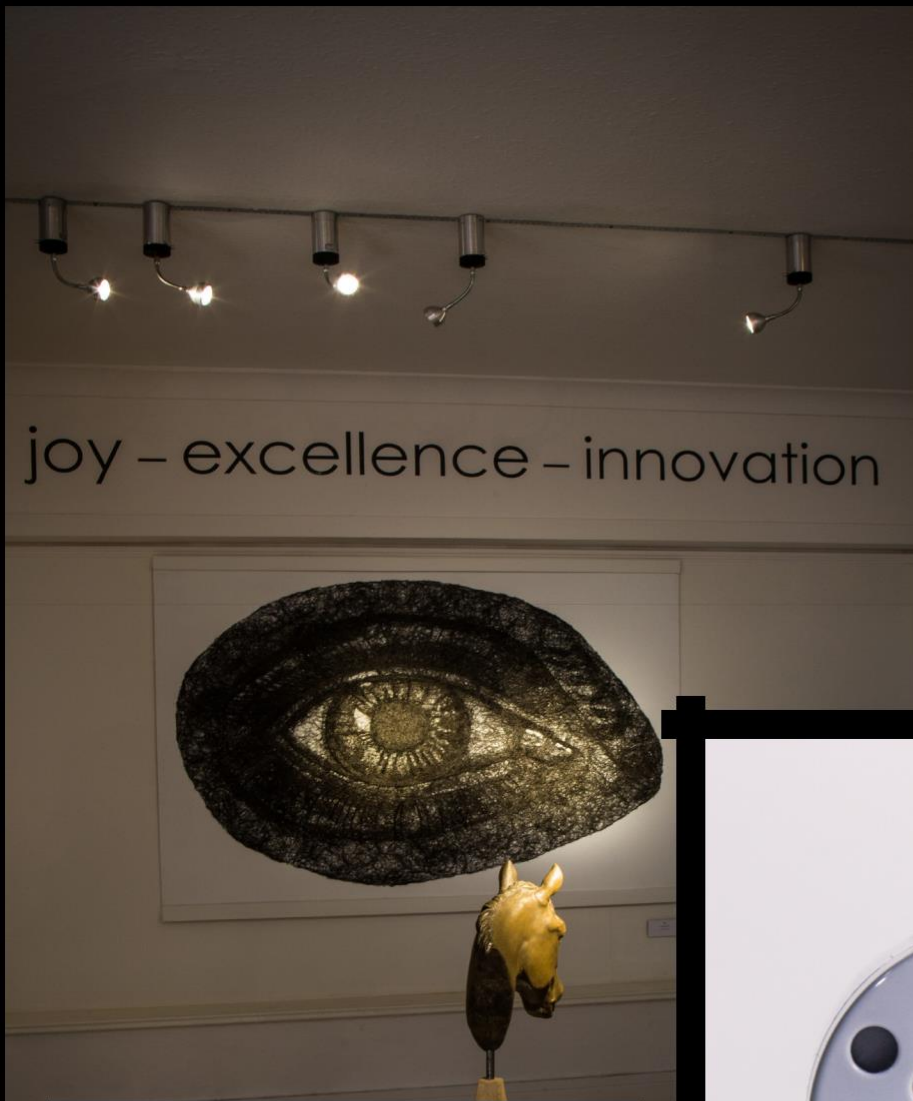

IP 65

8 HOUR MIN

APP CONTROL

Light Head

- 300 lumen single LED in warm white (3000K). Ideal colour for spot lighting
- Focus and zoom 5 to 45 degree with attractive flexible chrome tube. Easy positioning & no spring-back.

Power

- Lithium ion battery – same technology as used in CORE's entire range of lighting
- Charging singles, or in case of 6 or 10 units. Unit attaches with magnet and secured by lid.

Control

- Wireless control from phone/tablet
- Phone app means no lost remote handsets. No need to be directly under unit and multiple users can control

Benefits

- Zoomable 4-45 deg beam for concentrated spot from a tall ceiling
- Pick out objects such as a vase of flowers on a table or zoom to wider setting for paintings/larger objects
- Lithium battery lasts longer than most events at 12hours
- Charges in only 5 hours for same-day warehouse turnaround
- Simple operation by multiple users from the mobile phone app
- Aesthetically designed housing to complement the most exclusive surroundings
- Fast attachment with strong neodymium magnet or onto mechanical spigot
